VALUE ADDED TECHNOLOGY

EMF TECHNOLOGY

PROCESS

Indian Ion Exchange introduces EMF a latest state of art water treatment technology based on Electro Negativity and Electro Motive Force. It's a online treatment system non-chemical, without power & Resins.

FUNCTION

Indian Ion Exchange introduces EMF a latest EMF system is processed of sixteen Precious and semi Precious metal with thousands of ventures and thousands of Cathode and Anodes.

TECHNICAL SPECIFICATION

VALUE ADDED TECHNOLOGY

SPRING TECHNOLOGY

PROCESS

In nature, when the water fall from Mountain, it passes through various stone, metals, etc with velocity & impact thrust. During the time Air the resist it with its own velocity from bottom to top. Heavy friction results in remaining of gaseous impurity from water. Degas faction & enrichment of Oxygen (O₂). Hence Sweetness becomes is part of Spring Water

FUNCTION

The same natural technology is accepted by us, Here we provide one SS vessels, where, we inlet the water from Top of the systems and Enter the Air thorough Compressor from Bottom side. The aeration process between water and Air in center chamber passes various vendors & metals. The cavity gums water a fine filtration touch & also it is designed in such a friction that the water gets maximum time with air for artificial aeration. When the (Aeration) process are working, the Gaseous Impurities are separated and removed from Top of the Vessels though head Nozzle. The water after Aeration process becomes a Sweeter, free from Physical, Chemical, Biological and most importantly that Gaseous Impurities.

TECHNICAL SPECIFICATION

Type	:	Down Flow
Operating Flow rate:	:	0.25 M3
Operating Pressure:	:	2.0 Kg/cm ² .

SYS-4 4.2

COST: ` 0.45 Lacs

VALUE ADDED TECHNOLOGY

GAC TECHNOLOGY

PROCESS

GAC Filtration is important water of purification system of mineral water. While doing reverse osmosis the Total Dissolved Solid are reduced but the ratio of **Ca** to **TDS**, **Cl** to **Na**, **TH** to **Alk** etc., are not changed. Hence the taste traces remain same as Raw water.

FUNCTION

The Zeta potential granule anthracite combination will make above ratio changed in its limit. Hence, polishing of product water and improvement of good taste while processing through GAC. VALUE ADDED TECHNOLOGY

OZONE BOOSTER TECHNOLOGY

PROCESS

Ozone is a Tri atmospheric form of Oxygen, which unstable gas made from oxygen form atmospheric air which is use to oxidize all harmful Bacteria, Virus, Organic Matter, & Bad odor presence in water.

FUNCTION

This is a HDPE vertical storage tank is required for storage of ozone Product water. Inlet/Outlet PVC/HDPE pipe work with suitable isolation valves, levels Indicator, etc. are provided.
